Chapter 21
Factors influencing health status and contact with health services
Categories Z00–Z99
Official Coding Guidelines: Section 1.c.21. p. 75
Z00–Z13 Persons encountering health services for examination and investigation
Z14–Z15 Genetic carrier and genetic susceptibility to disease
Z16--Infection with drug-resistant microorganisms
Z17 --Estrogen receptor status
Z20–Z28 --Persons with potential health hazards related to communicable diseases
Z30–Z39 Persons encountering health services in circumstances related to reproduction
Z40 – Z53 Encounters for other specific health care
- Z55–Z65 Persons with potential health hazards related to socioeconomic and psychosocial circumstances
- Z66  Do not resuscitate (DNR) status
- Z67  Blood Type
- Z69–Z76 Persons encountering health services in other circumstances
- Z79–Z99 Persons with potential health hazards related to family and personal history and certain conditions influencing health status
Z Codes (Z00–Z99)

- Represent reason for encounter
  - Corresponding procedure code identifies any procedure performed.
- Used when circumstances other than a disease, an injury, or an external cause classifiable to categories A00 through Y89 are reason for encounter.
- Can be used as a first listed diagnosis for inpatients or a secondary diagnosis
- Some Z codes may only be used as PDX.
Two Occasions for use of Z Codes

1. When a person who may or may not be sick encounters health services for specific purpose
   ◦ receive limited care or service for current condition
   ◦ donate organ or tissue,
   ◦ receive a prophylactic vaccination,
   ◦ discuss problem which is in itself not a disease or injury

2. When some circumstance or problem is present that influences the person’s health status but is not in itself a current illness or injury
1.20.c. 1) Contact & Exposure – Z 20

- Indicates contact with, and suspected exposure, to communicable disease
- Used when patients show no sign/symptom of disease
- Are suspected to have been exposed by contact with infected individual or in area where disease is epidemic
- May be used as first listed diagnosis
  - Explain encounter for testing
- Secondary code to identify potential risk.
Inoculations & Vaccinations

- Category Z23
- Patient to receive prophylactic immunization against a disease
- Procedure codes identify actual administration of injection & type(s) of immunizations given
- May be used as secondary diagnosis when inoculation is part of routine preventive visit or well-baby care
Status

- Indicates patient is a
  - Carrier
  - Has sequelae or residual of past condition/disease
- Presence of prosthetic or mechanical device
- Status may affect course of treatment & its outcome
- Not used if diagnosis code includes information provided by status code
  - Z94.1 Heart transplant status
  - T86.2 Complications of heart transplant
Status Z Codes/Categories

- **Z14 Genetic Carrier**
  - Does not have disease but can pass to offspring

- **Z15 Genetic Susceptibility to Disease**
  - Person has gene that increases risk for disease
  - Not used as first listed code
  - If person has the disease, code disease
  - If seen for follow up after completed treatment & condition no longer exists, sequence F/U code first, followed by personal HX & genetic susceptibility
  - If encounter for genetic counseling, Z31.5 is first listed followed by Z15 category code.

- **Z16 Infection with drug-resistant organisms**
  - Sequence infection code first

- **Z17 Estrogen Receptor Status**
Status Z Codes/Categories

- Z 21 Asymptomatic HIV Infection Status
  - Tested positive for HIV but not signs/symptoms
  - Cannot report in California
- Z 22 Carrier of Infectious Disease
- Z28.3 Under-immunization Status
- Z33.1 Pregnant State Incidental
  - Secondary code when pregnancy is in no way complicating reason for visit.
- Z66 Do not resuscitate
- Z67 Blood Type
Z67 Blood type
Z67.1 Type A blood
  Z67.10 Type A blood, Rh positive
  Z67.11 Type A blood, Rh negative
Z67.2 Type B blood
  Z67.20 Type B blood, Rh positive
  Z67.21 Type B blood, Rh negative
Z67.3 Type AB blood
  Z67.30 Type AB blood, Rh positive
  Z67.31 Type AB blood, Rh negative
Z67.4 Type O blood
  Z67.40 Type O blood, Rh positive
  Z67.41 Type O blood, Rh negative
Z67.9 Unspecified blood type
  Z67.90 Unspecified type, Rh positive
  Z67.91 Unspecified type, Rh negative
Status Z Codes/Categories

- Z68 Body Mass Index
- Z74.01 Bed Confinement Status
- Z76.82 Awaiting Organ Transplant Status
- Z78 Other Specified Health Status
- Z79 Long Term Drug Therapy
  - Patient’s continuous use of prescribed drug for long-term treatment of condition/prophylactic use
    - Prevention of deep vein thrombosis – Coumadin
    - Treatment of chronic condition – (arthritis)
    - Disease requiring lengthy course of treatment (cancer)
  - Not for medication administered for short period to treat acute illness/injury (antibiotics for acute bronchitis)
  - Not for those with addictions to drugs
  - Not for detoxification or maintenance programs to prevent withdrawal
Status Z Codes/Categories

- Z88 Allergy Status to drugs, medicaments & biological substances
- Z89 Acquired absence of limbs
- Z90 Acquired absence of organs, NEC
- Z91.0 Allergy Status, other than to drugs & biological substances
- Z92.82 Status post administration of tPA (rtPA) in a different facility within last 24 hours prior to admission to a current facility.
  - Used if patient still receiving tPA at time they are received into the current facility
  - Condition for which tPA is administered sequenced first
  - Used only by the receiving facility
Status Z Codes/Categories

- Z93  Artificial Opening Status
- Z94  Transplanted Organ and tissue status
- Z95  Presence of cardiac & vascular implants and grafts
- Z96  Presence of other functional implants
- Z97  Presence of other devices
- Z98  Other post-procedural states
  - Z98.85, Transplanted organ removal status
    - Transplanted organ has been previously removed.
    - Not be assigned for the encounter when organ removed. Use complication code necessitating removal
- Z99  Dependence on Enabling machines & devices
Categories Z89–Z90 and Z93–Z99

- Used only if there are no complications or malfunctions
  - of the organ or tissue replaced,
  - the amputation site or
  - the equipment on which the patient is dependent
History (of)

- Personal history codes
  - Past medical condition that no longer exists and is not receiving any treatment, has potential for recurrence, and may require continued monitoring.
  - Used in conjunction with follow-up codes
  - Can code both history of primary and metastatic sites

- Family history codes
  - A family member(s) has had a particular disease that causes patient to be at higher risk of also contracting the disease.
  - Used in conjunction with screening codes to explain need for test or procedure.

- Acceptable on any medical record

- History of illness, even if no longer present, is important information that may alter type of treatment ordered.
Screening

- Testing for disease or disease precursors in seemingly well individuals so that early detection and treatment can be provided for those who test positive for the disease (e.g., screening mammogram).
- If patient has some sign or symptom, then it is a diagnostic examination, not a screening.
  - Code sign or symptom is used to explain the reason for the test.
- May be first listed code if the reason for the visit is specifically the screening exam.
- Used as an additional code if the screening is done during an office visit for other health problems.
- Not necessary if the screening is inherent to a routine examination,
  - pap smear done during a routine pelvic examination.
- Condition discovered during the screening are coded as an additional diagnosis.
Screening

- The Z code indicates screening exam is planned.
  - Procedure code will confirm screening was performed.
- Z11 Encounter for screening for infectious and parasitic diseases
- Z12 Encounter for screening for malignant neoplasms
- Z13 Encounter for screening for other diseases and disorders
- Z36 Encounter for antenatal screening for mother
Observation

- Z03 Encounter for medical observation for suspected diseases and conditions ruled out
- Z04 Encounter for examination and observation for other reasons
- Used when person is observed for suspected condition that is ruled out.
- Not for use if an injury or illness or any signs or symptoms related to the suspected condition are present.
  - the diagnosis/symptom code is used with the corresponding external cause code.
- Used as principal diagnosis only.
  - Additional codes may be used but only if they are unrelated to the suspected condition being observed.
Z03.7 Encounter for suspected maternal and fetal conditions ruled out,
May either be used as a first listed or as an additional code assignment
For use in very limited circumstances on a maternal record
Encounter is for suspected maternal or fetal condition that is ruled out during that encounter
  ◦ A maternal or fetal condition may be suspected due to an abnormal test result
Codes are not used when condition is confirmed.
  ◦ Code confirmed condition
Not used if illness or any signs/symptoms of suspected condition or problem are present.
  ◦ In such cases, the diagnosis/symptom code is used.
Aftercare Codes

- Cover situations when initial treatment of disease has been performed and patient requires continued care during the healing or recovery phase, or for the long-term consequences of the disease.
- Not used if treatment is directed at a current, acute disease.
  - Use diagnosis code in these cases.
- Exceptions to this rule are
  - Z51.0, Encounter for antineoplastic radiation therapy
  - Z51.1, Encounter for antineoplastic chemotherapy and immunotherapy.
Aftercare Codes

- These codes are first listed, followed by the diagnosis code when a patient’s encounter is solely to receive radiation therapy, chemotherapy, or immunotherapy for the treatment of a neoplasm.
- If the reason for the encounter is more than one type of antineoplastic therapy, code Z51.0 and a code from subcategory Z51.1 may be assigned together, in which case one of these codes would be reported as a secondary diagnosis.

- The aftercare Z codes are not be used for aftercare for injuries.
  - For aftercare of an injury, assign the acute injury code with the 7th character “D” (subsequent encounter).
- The aftercare codes are generally first listed to explain t
Aftercare Codes

- First listed to explain specific reason for encounter.
- May be used as an additional code when some type of aftercare is provided in addition to the reason for admission and no diagnosis code is applicable.
  - Closure of a colostomy during an encounter for treatment of another condition.
- Should be used in conjunction with other aftercare codes or diagnosis codes to provide better detail on the specifics of an aftercare encounter visit, unless otherwise directed by the classification.
- Should a patient receive multiple types of antineoplastic therapy during the same encounter, code Z51.0, Encounter for antineoplastic radiation therapy, and codes from subcategory Z51.1, Encounter for antineoplastic chemotherapy and immunotherapy, may be used together on a record.
Aftercare Codes

- Sequencing of multiple aftercare codes depends on circumstances of the encounter.
- Certain aftercare Z code categories need a secondary diagnosis code to describe the resolving condition or sequelae. For others, the condition is included in the code title.
- Additional Z code aftercare category terms include
  - fitting and adjustment, and
  - attention to artificial openings.
Aftercare Codes

- Status Z codes may be used with aftercare Z codes to indicate nature of the aftercare. For example
  - code Z95.1, Presence of aortocoronary bypass graft
  - Z48.812, Encounter for surgical aftercare following surgery on the circulatory system, to indicate the surgery for which the aftercare is being performed.

- A status code is not used when the aftercare code indicates the type of status,
  - Z43.0, Encounter for attention to tracheostomy, with Z93.0, Tracheostomy status.
Z42 Encounter for plastic and reconstructive surgery following medical procedure or healed injury
Z43 Encounter for attention to artificial openings
Z44 Encounter for fitting and adjustment of external prosthetic device
Z45 Encounter for adjustment and management of implanted device
Z46 Encounter for fitting and adjustment of other devices
Z47 Orthopedic aftercare
Z48 Encounter for other postprocedural aftercare
Z49 Encounter for care involving renal dialysis
Z51 Encounter for other aftercare
Followup

- Used to explain continuing surveillance following **completed treatment** of a disease, condition, or injury.
- Imply condition has been fully treated and no longer exists.
- Do not confused with aftercare codes, or injury codes with 7th character “D,” that explain ongoing care of a healing condition or its sequelae.
- May be used in conjunction with history codes to provide full picture of healed condition and its treatment.
  - The follow-up code is sequenced first, followed by the history code.
A follow-up code may be used to explain multiple visits.

Should a condition be found to have recurred on the follow-up visit,
- code for the condition assigned as an additional diagnosis.

- Z08 Encounter for follow-up examination after completed treatment for malignant neoplasm
- Z09 Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm
- Z39 Encounter for maternal postpartum care and examination
Donor

- Z52, Donors of organs and tissues,
- Used for living individuals who are donating blood or other body tissue.
- These codes are only for individuals donating for others, not for self-donations.
- Not used to identify cadaveric donations.
Counseling

- Used when a patient or family member receives assistance in the aftermath of an illness or injury, or when support is required in coping with family or social problems.
- Not used in conjunction with a diagnosis code when the counseling component of care is considered integral to standard treatment.
- Z30.0– Encounter for general counseling and advice on contraception
- Z31.5 Encounter for genetic counseling
- Z31.6– Encounter for general counseling and advice on procreation
- Z32.2 Encounter for childbirth instruction
Counseling

- Z32.3 Encounter for childcare instruction
- Z69 Encounter for mental health services for victim and perpetrator of abuse
- Z70 Counseling related to sexual attitude, behavior and orientation
- Z71 Persons encountering health services for other counseling and medical advice, not elsewhere classified
- Z76.81 Expectant mother prebirth pediatrician visit
Encounters for OB & Reproductive Services

- Used when none of the problems or complications included in the codes from the Obstetrics chapter exist
  - a routine prenatal visit or postpartum care
- Z34 Encounter for supervision of normal pregnancy
  - always first listed and not used with any other code from the OB chapter.
Encounters for OB & Reproductive Services

- **Z37 Outcome of delivery**
  - included on all maternal delivery records.
  - always a secondary code
  - Is not used on the newborn record.

- **Z codes for family planning (contraceptive) or procreative management and counseling** should be included on an obstetric record either during the pregnancy or the postpartum stage, if applicable.

- **Z33.2, Encounter for elective termination of pregnancy**
  - category excludes spontaneous abortion
Encounters for OB & Reproductive Services

- Z30 Encounter for contraceptive management
- Z31 Encounter for procreative management
- Z32.2 Encounter for childbirth instruction
- Z32.3 Encounter for childcare instruction
- Z33 Pregnant state
- Z34 Encounter for supervision of normal pregnancy
- Z36 Encounter for antenatal screening of mother
- Z37 Outcome of delivery
- Z39 Encounter for maternal postpartum care and examination
- Z76.81 Expectant mother prebirth pediatrician visit
Newborns & Infants

- *See Section I.C.16. Newborn (Perinatal) Guidelines, for further instruction on the use of these codes.*
- Z76.1 Encounter for health supervision and care of foundling
- Z00.1– Encounter for routine child health examination
- Z38 Liveborn infants according to place of birth and type of delivery
Routine & Administrative Exams

- Encounters for routine examinations,
  - a general check-up,
  - examinations for administrative purposes
    - a pre-employment physical.
- Not used if the examination is for diagnosis of a suspected condition or for treatment purposes.
  - In such cases the diagnosis code is used.
- During a routine exam, should a diagnosis or condition be discovered, it should be coded as an additional code.
Routine & Administrative Exams

- Pre-existing and chronic conditions and history codes may also be included as additional codes as long as examination is for administrative purposes and not focused on any particular condition.

- Some of the codes for routine health examinations distinguish between “with” and “without” abnormal findings.
Routine & Administrative Exams

- Code assignment depends on information known at time encounter is being coded.
  - For example, if no abnormal findings were found during the examination, but the encounter is being coded before test results are back, it is acceptable to assign the code for “without abnormal findings.”
- When assigning “with abnormal findings,”
  - additional code(s) assigned to identify the specific abnormal finding(s).
- Pre-operative examination & pre-procedural laboratory examination Z codes are for use only in those situations when a patient is being cleared for a procedure or surgery and no treatment is given.
Routine & Administrative Exams

- Z00 Encounter for general examination without complaint, suspected or reported diagnosis
- Z01 Encounter for other special examination without complaint, suspected or reported diagnosis
- Z02 Encounter for administrative examination
- Z32.0– Encounter for pregnancy test
Miscellaneous Z Codes

- Capture a number of other health care encounters that do not fall into one of the other categories.
- Identify the reason for the encounter
- Report additional codes that provide useful information on circumstances that may affect a patient’s care and treatment.
Prophylactic Organ Removal – Z40

- Prophylactic removal of breasts due to a genetic susceptibility to cancer or a family history of cancer
- Principal or first listed code
  - Code from category Z40, Encounter for prophylactic surgery,
  - Followed by the appropriate codes to identify the associated risk factor (such as genetic susceptibility or family history).
Prophylactic Organ Removal – Z40

- If the patient has a malignancy of one site and is having prophylactic removal at another site to prevent either a new primary malignancy or metastatic disease,
  - Code for the malignancy assigned in addition to a code from subcategory Z40.0, Encounter for prophylactic surgery for risk factors related to malignant neoplasms.
- Do not use Z40.0 code organ removal for treatment of a malignancy
  - Removal of the testes for the treatment of prostate cancer.
Miscellaneous Z Codes

- Z28 Immunization not carried out
- Z40 Encounter for prophylactic surgery
- Z41 Encounter for procedures for purposes other than remedying health state
- Z53 Persons encountering health services for specific procedures and treatment, not carried out
- Z55 Problems related to education and literacy
Miscellaneous Z Codes

- Z56 Problems related to employment and unemployment
- Z57 Occupational exposure to risk factors
- Z58 Problems related to physical environment
- Z59 Problems related to housing and economic circumstances
- Z60 Problems related to social environment
- Z62 Problems related to upbringing
Miscellaneous Z Codes

- Z63 Other problems related to primary support group, including family circumstances
- Z64 Problems related to certain psychosocial circumstances
- Z65 Problems related to other psychosocial circumstances
- Z72 Problems related to lifestyle
- Z73 Problems related to life management difficulty
- Z74 Problems related to care provider dependency
- Z75 Problems related to medical facilities and other health care
Miscellaneous Z Codes

- Z76.0 Encounter for issue of repeat prescription
- Z76.3 Healthy person accompanying sick person
- Z76.4 Other boarder to healthcare facility
- Z76.5 Malingerer [conscious simulation]
- Z76.89 Persons encountering health services in other specified circumstances
- Z91.1– Patient’s noncompliance with medical treatment and regimen
- Z91.89 Other specified
Nonspecific Z-Codes

- Little justification for use in inpatient setting.
- Use in outpatient setting should be limited to those instances when there is no further documentation to permit more precise coding. Otherwise, any sign or symptom or any other reason for visit that is captured in another code should be used.

- Nonspecific Z codes/categories:
  - Z02.9 Encounter for administrative examinations, unspecified
  - Z04.9 Encounter for examination and observation for unspecified reason
Use only as Principal/First Listed Diagnosis

- Z00 Encounter for general examination without complaint, suspected or reported diagnosis
- Z01 Encounter for other special examination without complaint, suspected or reported diagnosis
- Z02 Encounter for administrative examination
- Z03 Encounter for medical observation for suspected diseases and conditions ruled out
- Z33.2 Encounter for elective termination of pregnancy
- Z31.81 Encounter for male factor infertility in female patient
- Z31.82 Encounter for Rh incompatibility status
- Z31.83 Encounter for assisted reproductive fertility procedure cycle
- Z31.84 Encounter for fertility preservation procedure
- Z34 Encounter for supervision of normal pregnancy
Use only as Principal/First Listed Diagnosis

- Z39 Encounter for maternal postpartum care and examination
- Z38 Liveborn infants according to place of birth and type of delivery
- Z42 Encounter for plastic and reconstructive surgery following medical procedure or healed injury
- Z51.0 Encounter for antineoplastic radiation therapy
- Z51.1– Encounter for antineoplastic chemotherapy and immunotherapy
- Z52 Donors of organs and tissues
  - Except: Z52.9, Donor of unspecified organ or tissue
- Z76.1 Encounter for health supervision and care of foundling
- Z76.2 Encounter for health supervision and care of other healthy infant and child
- Z99.12 Encounter for respirator [ventilator] dependence during power failure
Expansions

- Z44.0 Encounter for fitting and adjustment of artificial arm
- Z44.00 Encounter for fitting and adjustment of unspecified artificial arm
- Z44.001 Encounter for fitting & adjustment of unspecified right artificial arm
- Z44.002 Encounter for fitting & adjustment of unspecified left artificial arm
- Z44.009 Encounter for fitting & adjustment of unspecified artificial arm, unspecified arm
Expansions

- Z70 Counseling related to sexual attitude, behavior and orientation
  - Z70.0 Counseling related to sexual attitude
  - Z70.1 Counseling related to patient’s sexual behavior and orientation
  - Z70.2 Counseling related to sexual behavior and orientation of third party
  - Z70.3 Counseling related to combined concerns regarding sexual attitude, behavior and orientation
  - Z70.8 Other sexual counseling
  - Z70.9 Sex counseling, unspecified
Z79 Long-term (current) drug therapy.
• Fourth characters identify drugs involved.
• Z79.0 Long-term (current) use of anticoagulants & antithrombotics/antiplatelets
• Z79.1 Long-term (current) use of non-steroidal antiinflammatories
• Z79.2 Long-term (current) use of antibiotics
Expansions

- Allergies to drugs, medicaments, and biological substances as well as to foods, insects, and non-medicinal substances. For example:
  - Z88  Allergy status to drugs, medicaments and biological substances
  - Z88.0  Allergy status to penicillin
  - Z88.1  Allergy status to other antibiotic agents status
  - Z88.2  Allergy status to sulfonamides status
Expansions

- Z91  Personal risk–factors, not elsewhere classified
- Z91.0  Allergy status, other than to drugs and biological substances
  - Z91.01  Food allergy status
    - Z91.010  Allergy to peanuts
    - Z91.011  Allergy to milk products
    - Z91.012  Allergy to eggs
    - Z91.013  Allergy to seafood, shellfish, octopus or squid ink
    - Z91.018  Allergy to other foods, buts other than peanuts
A 57 year old patient had suffered with melanoma for a number of years. She had a primary resection 10 years ago without recurrence. However, one year ago, melanoma was discovered in her axilla. She had an axillary dissection, but a few months later, she presented with sacral pain. Bone scan identified metastasis to the left femoral neck and right mid-femur sites. She had hepatic and adrenal metastasis as well. She is now admitted for chemotherapy. She was taken to the Operating Room where a Medtronic Port was placed subcutaneously into the subclavian to facilitate repeated infusions. During her stay, she received infusions of Thiotepa and Bleomycin (Blenoxane). She was discharged home.

Discharge Diagnosis: History of melanoma metastatic to the left and right femur, liver and adrenal gland.
Step 1. Look up in the Alphabetic Index
- Admission (for) – see also Encounter (for)
- Encounter (with health service) (for) Z76.89 – chemotherapy for neoplasm Z51.11

Step 2. Verify in the Tabular List
- Z51 Encounter for other aftercare
  Code also condition requiring care
  Excludes1: follow-up examination after treatment (Z08–Z09)
  Z51.0 Encounter for antineoplastic radiation therapy
  Z51.1 Encounter for antineoplastic chemotherapy and immunotherapy
  Excludes2: encounter for chemotherapy and immunotherapy for nonneoplastic condition – code to condition
  Z51.11 Encounter for antineoplastic chemotherapy
  Z51.12 Encounter for antineoplastic immunotherapy
Step 1 – Look in Alphabetic Index
Neoplasm, neoplastic – see also Neoplasm table
- Adrenal gland – C79.70
